

## Flowers Seeking Pollinators Conclusion Questions

**1. What evidence helped you decide *this* flower is *the* flower for this pollinator?**

(review your *actual* data; some have more than 3 characteristics to use)

**2. How are the pollinators adapted *to the flowers*?**

(examine the pollinator characteristics... how have they evolved to fit the flowers?)

**3. What might happen to your flower if their pollinator disappeared?**

(Would they survive? How might they change over time?)

**4. What might happen to your pollinator if their flower disappeared?**

(Would they survive? How might they change over time?)
